

CORFLEX.

Designed for life.

CORFLEX®

Designed for life.

Our Belief

We are committed to the highest standards of ethical conduct in all aspects of our business. We believe that honesty and integrity engender trust, which is the cornerstone of our business.

As a family owned and operated business, we take personal and professional pride in the products that we manufacture and distribute. We are proud of the fact that we have successfully cultivated a “family-friendly” working environment with generations of families contributing towards the steady growth of our company.

Our employees are respected, treated with fairness, and recognized as assets to our team. This principle philosophy allows each person to be consistently challenged in all aspects of their work, permitting them the opportunity to excel and advance professionally.

Our Operation

Our success in the global marketplace is the result of our commitment to our manufacturing and distribution facility, which recently saw a 25% increase in space occupied. That’s been our philosophy since we incorporated over twenty-five years ago, and it’s why we will continue to grow in America and abroad. We thank our customers for the support and trust they’ve shown us, and look forward to challenging ourselves to create new products that bring value to our customers and the medical community.

Our Intent

We will continue to make it possible for millions of people to resume every day activities; whether it is a return to work, resumption of a sports activity or simply to live a more active life. We feel growth isn’t just a priority, but a necessity for our business. Corflex will achieve its goals by continued diversification, product development and greater market penetration. We are committed to not only keep pace with the health care changes and challenges, but to help influence them.

We intend to maintain the twenty-nine year tradition of nurturing our corporate culture, manufacturing a high quality product and achieving desired patient outcomes. Corflex – designed for life.

How To Place An Order

The Corflex Customer Service Team is ready to assist you in placing your order. You may place your orders via a variety of methods:

TELEPHONE

800.426.7353, Ext. 1
603.623.3344, Ext. 1

FAX

603.623.4111

EMAIL

Terms & Conditions

Payment terms are Net 30 days. For the convenience of our customers Corflex also accepts MasterCard, Visa, Discover, American Express and wire transfers for payment of invoices. Orders are shipped F.O.B. Origin with shipping charges added to the invoice unless otherwise specified. Our minimum order is \$25; there will be a \$10 service charge on orders less than \$25.

Returns & Exchanges

An authorization number must be obtained from Corflex prior to returning or exchanging any product. All returns and exchanges are subject to the following re-stocking fees: 1-45 days 15% fee; 46-90 days 25% fee; after 90 days products are non-returnable for credit or exchange. Special orders or custom sized products may not be returned for credit or exchange.

Warranty

Corflex offers a limited lifetime warranty on the products it manufactures. Products manufactured by Corflex are warranted to the original purchaser against defects in workmanship and material for the life of the product. The foregoing warranty shall not apply to normal wear and tear; or if the product has been subjected to mis-use or application the warranty will be voided at the discretion of Corflex. Furthermore, Corflex offers no other warranty, express or implied, including but not limited to the implied warranties of merchantability and fitness of purpose.

Symbol Key

The following symbols are used throughout the catalog to assist you in locating products to fit your needs.

This symbol indicates that pediatric sizes are available for this product.

This symbol indicates that bariatric sizes are available for this product.

This symbol certifies that all products manufactured by Corflex are latex free.

This symbol indicates that certain precautions are needed when using this product.

This symbol identifies CoolTex products that are manufactured from a neoprene-alternative material.

Disc Unloader Spinal Orthosis

Designed by a leading physiatrist, the Disc Unloader provides relief from chronic or acute back pain by unloading pressure off the lumbar disc and shifting the load to the abdominal region. This brace is designed with patient comfort in mind. Made from a breathable lightweight fabric, the modular design of this versatile spinal orthosis allows it to be used throughout the continuum of care to provide stability and support without interfering with daily activities.

- ➔ Unique modular design reduces intradiscal pressure through circumferential compression, standard 6" anterior and 12" posterior panels accept anatomically designed inserts along with gel pack that provides the benefits of cold/hot therapy; available with extended 10" anterior panel for additional support of pendulous abdomen
- ➔ Indicated for chronic or acute low back pain, discogenic disc disease, post-surgical application, strains/sprains to lumbar muscles/ligaments and postural support
- ➔ Constructed of soft breathable fabric with contoured rigid A.B.S. inserts, elastic double-pulls and contact closure

Shoulder Abduction Pillow w/Firm Fit Sling

Developed in association with sports medicine leaders, our Shoulder Abduction Pillow with Firm Fit Sling achieves three objectives: secure immobilization for post operative use, ease of application for both practitioner and patient, maximum comfort and wearability for long or short term use. The contoured sling features moisture wicking terry cloth material and the pillow allows for 15° of abduction.

- Features easy to apply design with terry cloth sling for optimal patient comfort
- Indicated for treatment after Bankart repairs, rotator cuff repairs, shoulder arthroscopy, separations and dislocations
- Constructed of firm density foam covered in tricot material with terry cloth sling and exercise ball to stimulate circulation

Mid Length Humeral Splint

We designed this brace to increase patient comfort and save the practitioner valuable application time. Based on comments about frequently having to trim the distal end of humeral braces, the mid length was born. Corflex also offers extended and standard length braces. All three are designed to control humeral segments through soft tissue compression.

- Controls humeral segments through circumferential soft tissue compression and features deltoid cap extension to prevent migration; shorter length eliminates need to trim distal end
- Indicated for treatment of humeral diaphyseal fractures or deep humeral bone bruises
- Constructed of rigid polyethylene laminated with closed cell foam lining and contact closure; includes two stockinette undersleeves and one arm sling

Ultra Fit Wrist Splint

Our Ultra Fit Wrist Splint provides uniform compression and immobilizes the wrist joint at a neutral angle. Made from a durable lightweight foam laminate the brace breathes well ensuring patient comfort. Preformed malleable aluminum stay helps provide anatomically correct fit. Available in 8" or 10" lengths, sized or universal.

- Features easy one-hand application that provides comfortable support of the wrist while preserving finger mobility; available in two lengths
- Indicated for Carpal Tunnel Syndrome, tendonitis, wrist strains or sprains and post-cast removal
- Manufactured from durable, lightweight material with removable malleable aluminum palmar stay, flexible dorsal stay and contact closure; also available in universal size

Ultra Fit Wrist Splint w/Abducted Thumb

Our Ultra Fit Wrist Splint with Abducted Thumb provides consistent clinical results. Designed with dual adjustable aluminum stays that support the palmar surface of the wrist and extensor surface of the thumb. Available in two materials - durable lightweight tricot or breathable cool spacer fabric (see p. 39). May be used for tendonitis, sprains and strains, and post-cast removal.

- Features easy one-hand application and provides comfortable thumb and wrist immobilization while preserving mobility of the other fingers
- Indicated for deQuervain's Syndrome, tendonitis, thumb strains or sprains and post-cast removal
- Manufactured from durable, lightweight material with removable malleable aluminum palmar and thumb stays, flexible dorsal stay and contact closure

Finger Splints

- ➔ Provides comfortable immobilization and protection for the finger; available in packages of 12 or as part of an assortment kit
- ➔ Indicated for treatment of finger fractures, dislocations or as protection following injury
- ➔ Constructed of malleable aluminum with foam padding

Stax Splints

- ➔ Designed to provide immobilization of the distal finger or thumb, while allowing for examination of the finger tip and nailbed; available in packages of 12 or as part of an assortment kit
- ➔ Indicated for treatment of finger tip injuries, mallet finger or as protection following injury
- ➔ Manufactured from durable plastic

Forearm Splints

- ➔ Pre-molded design allows for optimal anatomic fit; available in various styles and sizes
- ➔ Indicated for treatment of fractures, severe sprains and strains of the wrist and post-operative rehabilitation
- ➔ Constructed of malleable aluminum with open cell foam padding

Compression Knee Immobilizer

All styles of our Compression Knee Immobilizer offer optimal immobilization of the knee and maximum patient comfort. Ideal for doctor's offices, emergency rooms and surgery centers because of it's universal sizing. Available with optional pockets to accommodate reusable gel packs, making it popular for post-op use.

- Features sewn-in contoured posterior stays, movable medial/lateral stays and elastic compression straps for optimal immobilization; available with pockets to hold gel packs for cold/hot therapy
- Indicated for post-op immobilization and mild to severe knee injuries where full extension of the leg is desired
- Constructed of breathable foam laminate, aluminum stays, premium quality elastic straps and contact closure

Cryo Pneumatic Knee Splint

Uniquely designed to combine the benefits of pneumatic compression and cold therapy. This anatomical wrap is ideal for post-surgical application or as part of a physical therapy or athletic training program to help reduce edema and decrease pain. It features an easy to use detachable pump and contoured reusable gel pack. Available in a universal size that fits either left or right.

- Anatomical knee wrap designed to combine the benefits of pneumatic compression with cold therapy; features pump bulb that detaches once desired compression is achieved
- Indicated for post-op application and as part of a physical therapy or athletic training program; helps diminish swelling/edema, decrease pain and reduce muscle spasms
- Manufactured from plush foam laminate with contact closure straps, removable gel pack with tricot lining and non-toxic gel; additional universal extension straps available

Contender Knee Brace

One of our most original designs, the Contender offers the convenience of a wrap above the knee and a sleeve below the knee. It is recommended for noncontact sports and activities of daily living. The polycentric hinge with contoured condyle shell has aluminum uprights and offers full flexion and extension control with settings at 0°, 15°, 30°, 60° and 90°. Also available in CoolTex, a neoprene alternative material.

- Features R.O.M. hinges with contoured condyle shells that allow for full flexion and extension control along with convenience of a sleeve below the knee and benefits of an adjustable wrap above the knee; available in two lengths
- Indicated for medial/lateral instability, muscle/ligament weakness or injury, ACL/PCL moderate instability, strains or sprains and degenerative joint disease where extension/flexion control is required
- Manufactured from either premium grade latex-free neoprene with suede hinge cover or CoolTex, a neoprene alternative

Posterior Adjustable Knee Sleeve w/Cor-Trak Buttress & Hinge

- ➔ Unique design offers the convenience of a sleeve below the knee and benefits of an adjustable wrap above the knee with moveable U-shaped Cor-Trak buttress for patella stabilization and heavy-duty hinges for optimal medial/lateral support
- ➔ Indicated for medial/lateral instability, muscle/ligament weakness or injury, ACL/PCL moderate instability, strains or sprains and degenerative joint disease where patella stabilization is required
- ➔ Manufactured from premium grade latex-free neoprene and compression molded textured neoprene buttress

U-Shaped Patella Stabilizer

- ➔ Features sewn-in U-shaped solid tubular buttress to provide optimal contact and patella stability with spiral stays to prevent rollover; some styles available with superior buttress placement
- ➔ Indicated for patella subluxation, patello-femoral tracking syndrome, treatment of patella alta/baja and as part of a rehabilitation program for patella tendon injuries
- ➔ Manufactured from premium grade latex-free neoprene or Cooltex, a neoprene alternative

Pneumatic Walker

Designed to increase stability and decrease edema, our walker features a built-in pump to achieve desired level of compression. Ideal for stable foot/ankle fractures, severe sprains, soft tissue injuries, post cast removal and post-surgical application. Cushion sole with low profile non-skid bottom promotes a natural gait. Available in two heights; both feature metal uprights.

- Easy to use air pump provides desired compression level and accommodates for swelling
- Indicated for stable foot or ankle fractures, severe sprains or strains, soft tissue injuries, post-op and post-cast removal
- Constructed of durable malleable metal uprights, easy to use air pump, circumferential bladder and contact closure straps
